

Trustee investment policy - approved client policy excerpt

Synthetic document facsimile - prepared for demonstration only.

Document / version	Record date	Owner / status
N03 / 2.0	2026-08-28	Alpenridge trustees / current

N03§1 | Threshold and scope

Exclude companies deriving 5% or more of revenue from tobacco production. No thermal coal. The policy contains no explicit issuer-parent methodology, provider designation, stale-data rule, or definition of thermal-coal involvement.

N03§2 | Portfolio objectives

Global investment-grade fixed income with CHF investor reporting. A 5% single corporate-issuer limit is proposed; sovereign issuers are exempt from this cap only. Client-specific interpretation of excluded activities remains necessary.

N03§3 | Authority

This policy was approved by the fictional trustees. Legal must reconcile it with the unsigned IMA; the onboarding assistant cannot infer a new exclusion threshold or treat the more restrictive rule as automatically authorized.

Evidence provenance
