

Opportunity prerequisites and planning boundary

Synthetic document facsimile - prepared for demonstration only.

Document / version	Record date	Owner / status
N05 / 1.0	2026-09-14	GCS Operations / current

N05§1 | Prerequisites

For this synthetic scenario only, the opportunity is won and IO vetting, CORG and applicable DAG/IOR approvals are recorded complete. Guideline, compliance, reporting and benchmark briefs have been returned with watch areas. Returned briefs do not establish that every open service question is resolved.

N05§2 | Ownership and systems

GCS Operations coordinates the plan; FI PAG coordinates the investment-side discussion; FI PC owns investment guideline implementation review. Execution remains in Appian and existing systems. Investor financial-account creation follows the Appian-to-Salesforce integration. This demonstration ends at a human-reviewed proposed workflow.

N05§3 | Scope

Use the five broad phases: information intake, account paperwork, operational setup, funding and post-funding. The seven workstreams can overlap. Propose which tasks move earlier because of the evidence; do not invent a universal order or an automatic release gate.

Evidence provenance

Source record: N05; original format: Approval register. The numbered passages preserve the existing demo corpus. PDF formatting does not grant additional authority to a draft, prior-client precedent or archived record.
