

Reporting service capability matrix

Synthetic document facsimile - prepared for demonstration only.

Document / version	Record date	Owner / status
O01 / 2.0	2026-09-08	Client Reporting / current

O01§1 | Available service

For the synthetic global IG bond platform, CHF holdings can be produced weekly on Tuesday by 12:00, subject to a validated source feed. Validated performance, attribution and ESG analytics are available monthly on the fifth business day. Weekly analytics by Monday 08:00 are not a supported standard service.

O01§2 | Dependency and approval

Attribution needs validated transactions, benchmark returns, currency calculations and reconciliation. Holdings availability alone does not prove attribution feasibility. A bespoke weekly service requires a separate feasibility assessment and authorized commercial/service acceptance; no committed build date exists.

O01§3 | Version authority

Version 2 supersedes O02 for new onboarding plans. Historical examples remain useful for failure patterns and preventive actions, but cannot establish current platform capability.

Evidence provenance

Source record: O01; original format: Capability assessment. The numbered passages preserve the existing demo corpus. PDF formatting does not grant additional authority to a draft, prior-client precedent or archived record.
