

Northbridge Endowment - exception or preventive-action record

Synthetic document facsimile - prepared for demonstration only.

Document / version	Record date	Owner / status
H02-E / 1.0	2025-09-09	Historical GCS Operations / historical

H02-E§1 | Observed event

The exactly-5% tobacco boundary produced different results between the policy and draft contract. Guideline clarification required eight business days of rework.

H02-E§2 | Risk mechanism

The policy excluded tobacco at $\geq 5\%$, while the draft contract said $>5\%$.

H02-E§3 | Outcome coding

Synthetic recorded workstream rework, in business days: reporting=0; guidelines=8; transfer=not applicable; derivatives=not applicable; benchmark=0. Zero means no recorded rework in this closed case; it is not a universal absence of risk. Workstream intervals can overlap.

Evidence provenance

Source record: H02-E; original format: Case record. The numbered passages preserve the existing demo corpus. PDF formatting does not grant additional authority to a draft, prior-client precedent or archived record.
