

Northbridge - restriction redline and implementation review

Synthetic document facsimile - prepared for demonstration only.

Document / version	Record date	Owner / status
H02-G / 1.0	2025-09-09	Historical Legal and FI PC / historical

H02-G§1 | Contract comparison

Client policy: 5% or more tobacco production revenue. Unsigned IMA: more than 5%. Approved Northbridge wording: 5% or more. The difference affected the exactly-5% boundary and required explicit client/Legal confirmation.

H02-G§2 | Approved implementation in that case

Compare TOB_PROD_REV_PCT >= 5 on the approved issuer-parent mapping. Missing or stale values enter manual review. The historical client approved a 30-calendar-day data-age threshold. Those provider, mapping and freshness choices do not automatically apply to Alpenridge.

H02-G§3 | Coal limitation

Northbridge did not implement a thermal-coal restriction. Its tobacco code provides no evidence for a coal threshold or the meaning of involvement.

Evidence provenance

Source record: H02-G; original format: Guideline review. The numbered passages preserve the existing demo corpus. PDF formatting does not grant additional authority to a draft, prior-client precedent or archived record.
