H05-S§1 | Requested versus accepted

The intake used the phrase weekly attribution. During week 1 the client accepted weekly CHF holdings on Tuesday with monthly performance, attribution and ESG analytics. A sample was tested before the agreement was finalized.

H05-S§2 | Counterevidence

No reporting rework was recorded. This is a successful preventive-action case. It does not demonstrate weekly attribution capability. Keep it in a cohort of initial requests for weekly attribution; exclude it from any claim that full weekly attribution was delivered.

H05-S§3 | Funding difference

Funding was cash-only and the guideline schedule was standard. This case is useful for service-scope resolution; it is weak evidence for transferred holdings or bespoke ESG interpretation.

Evidence provenance

Source record: H05-S; original format: Service acceptance. The numbered passages preserve the existing demo corpus. PDF formatting does not grant additional authority to a draft, prior-client precedent or archived record.
