

D01 / SOURCE RECORD

Client readiness email

Message field	Value
From	Maya Chen, Client Relationship Manager <maya.chen@example.com>
To	GCS Operations <gcs.operations@example.com>
Date	14 September 2026, 09:15 UTC
Subject	New mandate won - Alpenridge Pension Foundation - USD 250m

Email body

Team, Alpenridge has selected us for a new institutional separate account. The client is a Swiss pension foundation based in Zurich. Please target funding on 23 November 2026. The opportunity is marked Closed Won.

The global investment-grade fixed-income mandate is USD 250 million equivalent, with USD 50 million cash and USD 200 million of existing bonds. The reporting currency is CHF; the operational funding reference is USD equivalent. Please do not infer a currency conversion or hedge ratio from these figures.

The client wants a weekly CHF performance, attribution and ESG pack by Monday 08:00 Zurich time. In the sales discussion we said this should be achievable. The draft investment guidelines prohibit tobacco above 5% revenue and ask for no thermal-coal exposure.

FX forwards and interest-rate futures are requested from launch. Custody is with fictional Alpine Custody Services AG. Attached: opportunity brief, approval register, draft IMA, client policy, capability note and indicative transfer file.

CORG approval is referenced in the register. Please check the final IO review and conditions before initiating the formal request. We need one coordinated response to the client, not seven separate chasers.

Evidence anchors

Paragraphs 2-4 establish funding, reporting and restriction requests. This email is a request, not evidence that reporting support or approvals exist.

D02 / SOURCE RECORD

Opportunity and client brief

Field	Client context
Case / opportunity	SA-2026-0142 / OPP-DEMO-00482
Legal client	Alpenridge Pension Foundation (fictional)
Alias in email	Alpenridge PF; normalized provisionally, pending legal confirmation
Domicile / type	Switzerland / occupational pension foundation; institutional direct mandate
Mandate	Global investment-grade fixed income; bespoke example, not a named Capital Group product
Notional funding	USD 250,000,000 equivalent; custody valuation basis in D07
Initial mix	USD 200m in-kind + USD 50m cash
Currencies	CHF client reporting; multicurrency assets; USD-equivalent demo accounting
Target / origin	23 November 2026 / opportunity won 11 September 2026
Custodian	Alpine Custody Services AG (fictional); account AC-DEMO-7712
Benchmark	DEMO-GLOBAL-IG-CHF-H: synthetic global IG CHF-hedged benchmark
Authority / tax	Client authority and applicable tax documentation require specialist review; no form classification inferred from domicile
Fees, draft	18 bps on first USD 100m; 14 bps on next USD 150m; quarterly in arrears

Service and setup context

GCS Operations owns the case. FI PAG coordinates investment questions; FI PC reviews guideline feasibility. Appian coordinates execution; financial-account creation is simulated through Appian-to-Salesforce integration. The investor account must not be manually created in Salesforce.

For this institutional foundation, a retirement-plan recordkeeper and Form 5500 lookup are not assumed. The onboarding team confirms client-type applicability rather than importing the CIT checklist.

D03 / SOURCE RECORD

Pre-onboarding approval register

Status at 14 September 2026

Requirement	Evidence / status
Opportunity won	Closed Won, 11 Sep; present in D02
IO vetting	Completed 9 Sep; derivatives exception referred to IOR
CORG	10 Sep vote: approval subject to reporting feasibility and final IOR closure
DAG / IOR applicability	Synthetic case routing: IOR required; DAG separately not applicable per case governance owner. Validate actual routing with CG.
Final IOR	Missing final decision; derivatives counterparty and reporting exceptions open
Guideline template - FI PC	Returned 8 Sep with tobacco/coal interpretation questions
Compliance template - PACT	Returned 9 Sep; onboarding review may proceed after gate; funding clearance still required
Reporting template	Returned 8 Sep with weekly attribution marked nonstandard
Benchmark template - Results	Returned 9 Sep; synthetic benchmark available; account mapping pending

Gate decision

NOT READY FOR FORMAL INITIATION. Returned templates with open exceptions do not satisfy completion of all briefs and approvals. The AI may prepare a draft case and next actions; it must not create the formal Account Take On request.

Required closure

Obtain the final IOR decision and a recorded closure of CORG conditions. Obtain sign-off of revised guideline and reporting briefs. D10 is the later synthetic evidence pack that closes these pre-onboarding conditions, subject to downstream funding gates.

Committee names and owner mappings are retained from supplied process notes where legible. This demonstration does not certify actual Capital Group governance policy.

D04 / SOURCE RECORD

Investment management agreement - draft v3

Status and parties

DRAFT - NOT EXECUTED. Illustrative extracts between Alpenridge Pension Foundation and a Capital Group contracting entity to be confirmed by Legal. No signatures, legal addresses, or actual account instructions are supplied.

1. Mandate and funding

The proposed discretionary mandate is global investment-grade fixed income with an initial USD 250,000,000 equivalent portfolio. Assets may be delivered as cash and agreed eligible securities. Planned launch: 23 November 2026, subject to operational readiness.

3. Portfolio controls

3.1 Maximum corporate issuer exposure: 5% of total account NAV at issuer-parent level; sovereign securities are excluded from this corporate-issuer test. Missing issuer mapping requires review.

3.2 No below-investment-grade purchases under the agreed rating methodology. Downgrades, missing ratings, reconciliation differences and passive breaches follow the approved exception process. Duration and currency controls require final manager approval and system validation.

4. Restricted activities

4.1 The Manager shall not purchase securities of companies deriving more than 5% of revenue from tobacco production. The Account shall have no exposure to thermal coal.

4.2 Client exclusions shall be translated into system rules only after Legal and FI PC agree the measurement scope, threshold, provider, parent mapping, missing-data treatment and effective date.

Interpretation issue

Clause 4.1 is intentionally incomplete. The phrase "more than 5%" conflicts with the policy in D05 at exactly 5%. "No exposure to thermal coal" does not specify extraction, generation, revenue threshold, subsidiaries or indirect exposure.

D04 / SOURCE RECORD

Investment management agreement - draft v3 | continued

5. Derivatives

5.1 FX forwards may hedge currency exposure and interest-rate futures may manage duration, subject to finalized permitted instruments, counterparty documentation, relevant market access and operational controls. Inclusion in an IMA does not establish trading readiness.

6. Fee schedule

Annual rates on the stated USD-equivalent fee basis: 0.18% on the first USD 100 million and 0.14% on assets above USD 100 million up to USD 250 million. Quarterly in arrears. Fee currency, valuation convention, proration and tax treatment remain for Legal/Billing agreement.

Illustrative annual fee at a constant USD 250m: USD 180,000 + USD 210,000 = USD 390,000. A simple quarter is USD 97,500 before proration or adjustments. This is a synthetic arithmetic example, not Capital Group pricing.

7. Reporting

Weekly CHF performance, attribution and ESG reporting by Monday 08:00 Zurich time is requested. Until the service schedule is finalized, this is an unresolved request, not an accepted service commitment.

8. Execution status

Client signature: not provided. Manager signature: not provided. Tax and AML evidence are reviewed through the appropriate specialist workstreams. No funding or trade release is authorized by this draft.

D05 / SOURCE RECORD

Client investment policy - v2

Client-supplied policy excerpt

Policy version 2, adopted by the fictional foundation board on 1 September 2026. The policy expresses client intent and does not itself amend the unsigned IMA.

Policy reference	Requirement
IPS 2.1 / tobacco	Exclude corporate issuers with tobacco-production revenue greater than or equal to 5% of total revenue.
IPS 2.2 / coal	Exclude thermal-coal exposure. Detailed interpretation to be confirmed with the investment committee.
IPS 2.3 / data	Use the approved external ESG dataset and current issuer-parent mapping. The provider and refresh standard are to be confirmed.
IPS 3.1 / concentration	Corporate parent issuer cap 5% of total account NAV; sovereign exemption applies only to this cap.
IPS 4.1 / currencies	Client reporting in CHF. Hedging objective and approved instruments are documented in the final mandate.
IPS 5.1 / reports	Weekly reporting request; client is willing to discuss operationally feasible timing.

Authority and limitations

Synthetic board-policy record. Legal must reconcile the policy and IMA; AI must not choose whichever source looks newest and silently alter the contract.

No Swiss regulatory obligation is asserted here. The weekly reporting requirement is a fictional client preference. Country-specific legal and tax obligations remain matters for qualified reviewers.

D06 / SOURCE RECORD

Reporting capability assessment

Synthetic operational capability snapshot

Prepared by Elena Rossi, Client Reporting, 8 September 2026. These are designed scenario constraints; they do not describe verified Capital Group capabilities.

Requested output	Assessed support
Weekly holdings in CHF	Supported using custodian positions, after reconciliation; Tuesday 12:00 Zurich target.
Weekly performance	Provisional return file can be reviewed; not part of standard validated weekly attribution service in this scenario.
Weekly attribution + ESG	No validated automated weekly CHF attribution/ESG pipeline available for launch.
Monthly performance, attribution, ESG	Supported by fifth business day, after data checks and Client Reporting review.
Monday 08:00 Zurich	Incompatible with this scenario's upstream reconciliation cycle. Local time and holiday calendars must be configured.
Benchmark setup	DEMO-GLOBAL-IG-CHF-H available for demonstration; mapping, rights and file validation require Results owner confirmation.

Proposed service alternative

Weekly reconciled holdings/cash in CHF on Tuesday at 12:00 Zurich; monthly validated performance, attribution and ESG by the fifth business day. The RM must obtain client agreement and Legal must update the service schedule before activation.

Watch area

D01 contains a sales expectation. Do not treat it as system capability. Raise one reporting decision with client impact, alternatives, owner and source references rather than promising a delivery date automatically.

D07 / SOURCE RECORD

Indicative custody and transfer file

Custody confirmation

Alpine Custody Services AG (fictional) | Account AC-DEMO-7712 | Report date 11 September 2026. Indicative holdings are USD-equivalent market values provided by the custodian for demo analysis; they are not face values or executable instructions.

Security / issuer	USD m	Tobacco %	Coal %
DEMO-GOV-01 Republic of Northvale	55	0	0
DEMO-GOV-02 Kingdom of Westhaven	45	0	0
DEMO-COR-01 Alder Tobacco Holdings	10	5	0
DEMO-COR-02 Granite Basin Mining	10	0	12
DEMO-COR-03 Meridian Industrials	10	Missing	Missing
DEMO-COR-04 Cedar Telecom	10	0	0
DEMO-COR-05 Harbor Utilities	10	0	2
DEMO-COR-06 Orion Healthcare	10	0	0
DEMO-COR-07 Summit Rail	10	0	0
DEMO-COR-08 Pine Technology	10	0	0
DEMO-COR-09 Lumen Consumer	10	1	0
DEMO-COR-10 Brookfield Demo Bank	10	0	0

Indicative in-kind total: USD 200m. Separate planned cash: USD 50m. Total mandate: USD 250m. Security identifiers are deliberately nontradeable demo IDs.

D07 / SOURCE RECORD

Indicative custody and transfer file | continued

Settlement and control notes

The custodian can provisionally support 23 November subject to final eligible-securities list, confirmed market access, reconciled account details, signed instructions and independently verified settlement details. No bank routing numbers, account credentials or wire instructions are included.

Corporate issuer exposure is measured against total USD 250m account NAV, not just the USD 200m transfer file. Each USD 10m corporate parent position is 4%; government rows are exempt only from the corporate-issuer concentration cap.

ESG measures are synthetic percentages of issuer revenue. Missing values must remain unknown. Dataset timestamp is 11 September; refresh is required before funding. A September screen is not valid proof of November readiness.

Testable seeded outcomes after D09 clarification

Alder Tobacco Holdings at exactly 5% fails the agreed $\geq 5\%$ tobacco rule. Granite Basin Mining at 12% fails the agreed $\geq 10\%$ thermal-coal extraction rule. Meridian Industrials has missing ESG data and goes to review; it is not automatically compliant.

Illustrative transition choice: retain these three USD 10m positions with the outgoing manager and replace USD 30m of in-kind funding with cash. Proposed revised mix is USD 170m in-kind + USD 80m cash. This is a planning proposal, not an order to sell or transfer.

D08 / SOURCE RECORD

Comparable onboarding casebook

Retrieval fixtures - all three cases are fictional

History informs recommendations; no retrieved case grants authority or proves current system capability. Similarity is explained through shared attributes, not a fabricated success probability.

Prior case	Transferable lesson / limitation
H01 - Alpinecrest Foundation Switzerland / IG bonds / CHF reporting	Weekly attribution was requested; client accepted weekly holdings plus a monthly validated pack. Match: domicile, asset class, reporting currency. Limitation: different deadlines and provider dependencies.
H02 - Northbridge Endowment Global bonds / tobacco restriction	IMA said >5%; client policy said >=5%. Legal clarified the boundary and FI PC tested values below, at and above 5%. Match: contractual ambiguity. Limitation: US endowment context; not evidence of Swiss law.
H03 - Seabrook Insurance In-kind bonds / derivatives	Counterparty setup threatened launch. Team agreed a cash substitution for restricted securities and deferred derivatives until approvals were complete. Match: transition and readiness dependencies. Limitation: insurance mandate controls differ.

Recommended adaptation to this case

Borrow the decision pattern, not the prior conclusion. Open a reporting-service decision, obtain client/Legal clarification of restriction thresholds, test the transfer file, and require the derivatives setup owner to confirm feasibility.

Access controls, case-level permissions and permission-aware retrieval would be required before real historical records are used.

D09 / SOURCE RECORD

Client restriction clarification

Message field	Value
From	Sofia Keller, Client Investment Director <sofia.keller@example.com>
To / date	Client RM and Legal / 15 September 2026, 10:10 UTC
Subject	Clarification: exclusion policy for SA-2026-0142

Client clarification

For the contractual schedule, tobacco production is excluded at greater than or equal to 5% of total issuer revenue. For thermal coal, we mean extraction revenue greater than or equal to 10%; we are not requesting a separate coal-power generation threshold in this schedule.

Apply the tests to directly held corporate securities using the approved issuer-parent mapping and Demo ESG Dataset version 2026-09. Indirect fund exposure is outside this draft rule and would require a separate decision. Missing, unmapped or stale observations require review before purchase or transfer; do not assume zero exposure.

Data must be refreshed for go-live. For this synthetic scenario, the agreed freshness threshold is 30 calendar days at screening. Actual thresholds and licensed providers must be agreed by the appropriate teams.

Next approval

Please prepare the revised schedule for our approval. This email clarifies intent but does not execute the IMA. Legal owns contractual language; FI PC owns the rule interpretation and approves implementation after boundary testing.

Draft candidate language

No purchase or transfer of a direct corporate security where tobacco-production revenue is $\geq 5\%$ or thermal-coal extraction revenue is $\geq 10\%$, measured at the approved issuer-parent level. Missing, unmapped or >30 -day-old data requires manual review and blocks release pending disposition.

D10 / SOURCE RECORD

Governance closure evidence

Synthetic pre-onboarding closure - 16 September 2026

Approvals below are fictional scenario records. They are replayed into the demo by the presenter and are not generated or granted by AI.

Gate component	Recorded closure
IOR final decision	Approved to initiate; derivatives and reporting launch controls remain funding prerequisites.
CORG conditions	Governance owner records closure based on approved reporting feasibility plan, revised guideline brief and final IOR. No open pre-initiation condition remains.
Guideline / FI PC brief	Feasibility accepted on D09 interpretation; actual rule promotion still requires Legal and FI PC review in operational setup.
Reporting brief	Alternative service feasible under D06. Client agreement / service schedule remains an activation gate.
Compliance brief	Vetting brief accepted. Final KYC/AML and tax disposition remain funding gates.
Benchmark / Results brief	Availability confirmed for synthetic benchmark; mapping and reconciliation remain operational tasks.
DAG applicability	Separate DAG not required under this invented case routing; governance owner records determination.
Opportunity	Closed Won reaffirmed; USD 250m; new institutional separate account.

Permitted next action

GCS Operations may review and initiate the formal Account Take On request after verifying this pack. This does not authorize account funding, trading, client communications, or production system writes.

Preserve the distinction between opportunity vetting, formal initiation and funding release. Passing one gate must not silently pass later gates.

D11 / SOURCE RECORD

Reporting and transition agreement

Synthetic client agreement - 17 September 2026

Sofia Keller, client investment director, confirms the following scenario choices for review and incorporation into final documentation. No handwritten or digital signatures are simulated.

Decision	Agreed position
Reporting	Weekly reconciled holdings/cash in CHF: Tuesday 12:00 Zurich. Monthly performance, attribution and ESG: fifth business day.
Service acceptance	Client agrees to alternative service; Legal must incorporate it in the final service schedule. Reporting owner must validate setup.
Transfer remediation	Do not transfer Alder Tobacco, Granite Basin or Meridian Industrials. These remain with the outgoing manager; replace their combined USD 30m with cash.
Revised funding	USD 170m eligible in-kind + USD 80m cash = USD 250m. No liquidation or wire instruction is authorized by this demo.
Launch target	23 November 2026; any earlier date requires a separate approved plan.
Derivative controls	FX forwards and rate futures remain gated by legal, counterparty and operational readiness.

Cross-check

D07 contains twelve positions. Excluding three USD 10m positions leaves nine positions totaling USD 170m. Total mandate size and draft fee tiers are unchanged.

Client agreement alone does not approve operational implementation. Reporting, Legal, transition and Operations reviewers must record their decisions against the current case revision.

D12 / SOURCE RECORD

Late client change request

Message field	Value
From / date	Sofia Keller <sofia.keller@example.com> / 19 October 2026
Subject	Can we bring funding forward to 9 November?

Change request

Our board would like to move launch from 23 November to 9 November 2026, two weeks earlier. Can we still start with FX forwards and interest-rate futures? Please preserve the revised reporting service and exclusions.

Contemporaneous scenario constraint

The setup owner estimates derivatives readiness on 16 November. Custody and core cash-bond setup could support 9 November, but only if the relevant teams and client approve a bonds-only launch and the revised hedge/duration implications. These are scenario estimates, not commitments.

Options the assistant should present

A. Preserve the full mandate on 23 November; re-confirm client date preference. B. Explore 9 November with derivatives deferred; reopen Legal/PM, FI PC, transition, custody and Operations decisions. C. Retain the current plan while seeking an evidence-backed acceleration of derivatives readiness; do not invent an earlier completion date.

For the guided demo choose B. Record client and accountable owner acceptance of the staged mandate; rerun screening and funding controls for the new date. No previous funding approval may carry forward automatically.

D13 / SOURCE RECORD

Final readiness evidence - staged launch

Synthetic status as of 6 November 2026

This evidence pack supports the revised 9 November bonds-only launch. It is released late in the rehearsal, after the presenter has injected the client change and approved the revised plan. It is not real executed documentation.

Workstream	Fictional evidence receipt
Documentation / IMA	DOC-481: executed-IMA receipt recorded by Legal; schedule reflects D09 restrictions, D11 reporting, and staged launch without derivatives. Signed instrument is not reproduced.
Tax / AML / authority	CMP-442: specialists record completed review, authority confirmation and applicable tax-document acceptance. No automatic tax classification claimed.
Systems / benchmark	SYS-215: account setup and synthetic benchmark mapping reconciled. Financial account created by Appian-to-SFDC integration; no manual duplicate.
Custody / markets	CUS-193: core bond markets open; custody details independently verified by maker/checker; no payment information shown.
Guideline rules	RUL-981: Legal/FI PC-approved rules tested in a sandbox; current ESG and issuer mapping snapshot 6 Nov; initial funding portfolio passes approved tests.
Derivatives	DER-028: disabled for initial launch; staged scope acknowledged by client, Legal, PM and FI PC. Re-enable only via a new signed-off change after actual setup completion.
Portfolio / funding	TRN-661: nine eligible positions USD 170m plus USD 80m cash; reconciliation complete; client/transition/PM acceptance recorded.
Reporting / billing	REP-117 and BILL-051: sample report accepted, service calendar configured, fee tier test and currency/proration setup accepted.

Remaining human control

GCS maker recommends ready. An independent Operations checker must record the final simulated funding-release decision against the current plan. AI cannot attest that signatures, reviews, custody verification or approvals occurred.

D13 / SOURCE RECORD

Final readiness evidence - staged launch | continued

Post-funding rehearsal receipt - 9/10 November 2026

This second page is an event fixture used only after simulated release. FND-DEMO-119 records USD 80m cash and USD 170m in-kind received and reconciled. No transfer is initiated by the demo.

Check	Fictional result
Cash and positions	USD 250m total received; nine securities plus cash reconcile.
Investment restrictions	Current dataset re-screened; no unresolved tobacco/coal flags in accepted assets. Other mandate controls remain governed by approved monitoring.
Derivatives	Trading disabled; follow-up readiness review on/after 16 Nov, no automatic activation.
Client service	First weekly holdings report scheduled 10 Nov; first monthly pack scheduled using configured business-day calendar.
Billing / benchmark	Fee basis and benchmark mapped; first-cycle service review assigned.
Exceptions / handoff	No unresolved blocking demo exception; monitoring owners retained.

Audit and operating boundary

The demo records these as imported synthetic events. It does not connect to a custodian, create a production account, verify actual AML documents or execute a trade.
