Subject	New mandate won - Alpenridge Pension Foundation - USD 250m

Email body

Team, Alpenridge has selected us for a new institutional separate account. The client is a Swiss pension foundation based in Zurich. Please target funding on 23 November 2026. The opportunity is marked Closed Won.

The global investment-grade fixed-income mandate is USD 250 million equivalent, with USD 50 million cash and USD 200 million of existing bonds. The reporting currency is CHF; the operational funding reference is USD equivalent. Please do not infer a currency conversion or hedge ratio from these figures.

The client wants a weekly CHF performance, attribution and ESG pack by Monday 08:00 Zurich time. In the sales discussion we said this should be achievable. The draft investment guidelines prohibit tobacco above 5% revenue and ask for no thermal-coal exposure.

FX forwards and interest-rate futures are requested from launch. Custody is with fictional Alpine Custody Services AG. Attached: opportunity brief, approval register, draft IMA, client policy, capability note and indicative transfer file.

CORG approval is referenced in the register. Please check the final IO review and conditions before initiating the formal request. We need one coordinated response to the client, not seven separate chasers.

Evidence anchors

Paragraphs 2-4 establish funding, reporting and restriction requests. This email is a request, not evidence that reporting support or approvals exist.
